Free code: github.com/pavelpravosud/ai-morning-briefing. Runs on GitHub Actions with Claude. Works anywhere.

Not sure?
Start with your own read-only agent. You learn how agents behave before you give one access to your accounts.

2 · SET UP THE FREE AGENT (5 STEPS)

- [ ] **Copy the repo:** click *Use this template* on the GitHub page.
- [ ] **Add your key:** Settings → Secrets and variables → Actions → New repository secret → `ANTHROPIC_API_KEY`.
- [ ] **Pick sources:** edit `sources.txt`, one line per source: `Name | URL`.
- [ ] **Shape the briefing:** edit `prompt.md` (format, length, what matters to you).
- [ ] **Test it:** Actions → AI Morning Briefing → Run workflow. Turn on Watch → All activity to get it by e-mail.

3 · CONTROL THE COST

- [ ] Routine, well-defined jobs: **Claude Sonnet 5.5** ($2 in / $10 out per million tokens). A daily briefing costs about 1-5 cents.
- [ ] Long, open-ended work, or agents that read the open web: **Claude Opus 5.5 on medium effort**.

4 · THREE SAFETY RULES

- [ ] **Start read-only.** Let it watch and report for a week before it can act.
- [ ] **Approvals** for anything that sends, buys or deletes. Keep them switched on.
- [ ] **Keys live in a vault.** Never paste a password or API key into a prompt.

5 · YOUR FIRST FIVE JOBS

- [ ] Morning briefing · Competitor watch · Inbox triage (drafts only) · Meeting prep pack · Weekly report first draft
